Cozy autumn is here, get cheap [Animal Crossing New Horizons items](#), bells and [ANCH NMT](#) to dress up your island easily from AKRPG.COM. You need to create some places suitable for leisure and relaxation on your island, such as an outdoor bar, a small market filled with stalls, a small bamboo park with Japanese styles, and even a small children's playground full of childishness. This is the original intention of this island design. Of course you can carry out more terrain transformations, such as adding large waterfalls, bridges, slopes, and multi-layer cliffs. Flowers, bushes, and trees are properly planted in free areas to add beauty to the island.
