This is a chill and Asian countryside island with a Japanese Cottagecore vibe, features a Zen courtyard, a Bamboo garden, a Chinese restaurant. Secondly, the island is also mixed with other natural elements, such as fountain parks and modern museums. The creator used Zen Fence and Imperial Fence to create a number of small areas in Japanese and Chinese styles. Bamboo and bamboo furniture are cleverly placed in these small areas, creating a strong Zen Cottagecore atmosphere. In the open-air Chinese restaurant, royal furniture is perfectly used. On the other side of the island, we can also see a museum that uses Egyptian pyramid objects to create an entrance. Of course, you can also find the beauty of the city park here.
