Antique Phone

This is a super cost-effective living room design. The overall style is simple and fashionable. The background color arrangement is mainly white and green. The room items are arranged simple and clear. The white furniture mainly makes the whole room transparent and bright. The white piano is placed for daily entertainment. The bookcase layout allows people to make appointments and learn the layout of the writing area. If you want to be at home and relax properly, you can sit lazily on the sofa and watch TV for a while. This is a good living room design for leisure, entertainment, and learning.
