Do you like the simplicity of a Chinese-style room? This small room is a multi-functional room with four functions: office, resting, cooking, and relaxing, which are diversified through the placement of different objects. As you enter the room, you can clearly see the overall layout of the room, with a screened Chinese bed, a vintage record player, greenery, a wooden desk and chair in the corner of the room, and a rattan chair for working and relaxing, and a small corner with a cooker and a dishwasher for cooking. For cost reasons, this is a very practical and versatile room for everyday life and work. We hope you will also like the simplicity of this design.
